

Lake View Township Chicago: Multifamily & Commercial Real Estate Valuation Report

The CCAO's statutory duty is to estimate the Fair Market Value of property and then produce assessments in accordance with those estimates. To do this, we hold a mirror to the market. The CCAO is confident that the 2021 reassessment of Lake View Township commercial properties reflects an in-depth and professionally researched valuation methodology. Most commercial properties generate income from rent, and so for most properties the CCAO uses the industry-standard income approach to mass appraisal of commercial real estate, supplemented with sales analyses.

Lake View Township—one of Chicago's eight townships—is home to 1,967 commercial apartment buildings, 12 hotels, 218 large office buildings, 144 industrial buildings, 358 retail shopping centers and special commercial structures.

2021 is the first scheduled reassessment of Lake View Township since its last reassessment in 2018. The 2021 reassessment is an opportunity to ensure that property assessments mirror the market, such that property taxes are fairly divided among all properties.

Executive Summary

In the three years since 2018, property values in most of Chicago's commercial real estate sectors have risen overall. Chicago has been a steady, vibrant place for local, national, and international commercial real estate investors. Commercial real estate sale prices and rents—therefore, estimated market values and assessed values—have grown overall from 2018 to 2021 for most property types.

In the last year, COVID-19 and associated shutdowns have had varying effects throughout Chicago. Hotels and retail properties are among the sectors with the largest declines since the onset of COVID, whereas grocery stores, industrial buildings, and data centers have been stable or even met positive growth since the onset of COVID.

Reassessments conducted in 2021 will affect the second installment property tax bills for Tax Year 2021, issued in summer of 2022.

Effects of this reassessment on an individual's property tax bill are impossible to predict based on just one property's change in assessed value. Each property's share of the overall property taxes for a taxing agency's district depends on its share of the total assessed values of all properties in that district. The assessed values of all properties in Lake View Township comprised approximately 13% of the total assessed value of the City of Chicago in 2018. Assessments throughout the other townships in the City of Chicago will affect how property taxes are distributed among property owners throughout the City.

A typical Chicago property's taxes contribute to a dozen taxing districts, all listed on the property tax bills issued by the Cook County Treasurer.

The remainder of this report provides significant detail for valuations of income-producing properties in Lake View Township. The CCAO is committed to transparency in all that we do and the detail provided here is a result of that commitment.

Valuation method: Income Approach

Our office looks at commercial property the way a buyer would approach a market transaction: by examining its highest and best use through three valuation approaches:

- Income
- Sales comparison
- Cost

For income-producing properties, “the income approach is the preferred valuation approach” (International Association of Assessing Officers, Standard on Mass Appraisal of Real Property, Section 4.4). Our office primarily relies on the **income approach**, with secondary support and consideration from other approaches.

The **income approach** begins with analyzing income and expense data to determine typical gross incomes, vacancy rates, net incomes, and expense ratios for comparable types of properties.

Income estimates can be transformed (capitalized) into estimates of building value in various ways. The CCAO uses **unloaded cap rates**, which, consistent with general real estate market analysis, account for expenses and real estate taxes in transforming income into estimated value.

Assessment methodology: Investment Class Categorization

Properties are categorized into similar groups by the CCAO into categories. These categories include investment classes as described below.

Investment Class Category	Investment Class Description
Institutional	<ul style="list-style-type: none">• Highest Quality• Typically the focus of national and international investors• Typically lower cap rates
Regional	<ul style="list-style-type: none">• Typically distinguished from Institutional class by age, size, and condition• Larger and more complex than Neighborhood class• Frequently a transitional property• Typically the focus of regional and national investors
Neighborhood	<ul style="list-style-type: none">• Typically smaller properties• Typical commercial tenant is an owner user or local business• Typically the focus of only local investors• Typically higher cap rates

Apartments containing 7+ units

The following table describes the ranges of rents, vacancy rates, expense rates, and cap rates, based on our data sources and interviews with local market participants, used to calculate 2021 fair market values of Lake View Township apartments. Apartments were categorized into groups of investment category group based on a combination of factors like building quality and per-unit rent.

	Property information		Inputs to Valuation Model				CCAO Valuations
Group	# buildings in this group	Size: # units per building (range)	Income: Rent \$/unit (range)	Vacancy (range)	Expense ratio (range)	Cap rate	CCAO estimated Market Value \$/unit (range)
Institutional	21	11 - 381	\$875 - \$4300	5 - 6.7%	40%	5.25%	\$156,192 to \$469,165
Regional *	68	7 - 456	\$875 - \$4300	5 - 6.7%	40%	6%	\$99,120 to \$347,181
Neighborhood A *	1132	2 - 411	\$875 - \$4300	5 - 6.7%	45%	8%	\$67,894 to \$439,288
Neighborhood B	701	6 - 210	\$875 - \$4300	5 - 6.7%	45%	11 – 12%	\$33,406 to \$362,550
Affordable Housing (Class 9 Incentive)	45	6 - 500	\$875 - \$4300	5 - 6.7%	60%	12%	\$33,040 to \$90,021

* Includes 22 affordable housing properties with rents ranging from \$875-\$3495, vacancy ranging from 5 to 6.7%, expense ratio of 60%, and cap rates of 12%, with estimated market values ranging from \$872,168. - \$5,052,195.

Hotels

The following table describes the ranges of average daily rates, occupancy, operating expense ratios (as a percentage of total revenue) and EBITDA levels based on industry standards, data sources and interviews with local market participants. These factors were used to calculate 2021 fair market values for Lake View Township hotels. Each property was delineated on the basis of property type and property class as defined by STR.com, the premier hotel industry data resource. Full Service hotels were rated by industry classifications such as Luxury, Upper Upscale and Upscale classes. Limited Service hotels were rated on the basis of Upper Midscale, Midscale and Economy classes.

Given the COVID pandemic, stabilized occupancy and average daily rates were reduced.

	<u>Property information</u>		<u>Inputs to Valuation Model</u>				<u>CCAO Valuations</u>
Group	# buildings in this group	Size: # keys per building (range)	Income*: Average Daily Rate (ADR) \$/key (range)	Occupancy (range)	EBITDA (% of Total Revenue) Expense ratio (range)	Cap rate (range)	CCAO estimated Market Value \$/key (range)
Full Service - Luxury*	1	25	278	59%	24%	8.0%	\$313,851
Full Service - Upper Upscale*	4	14-173	\$157	60%	28%	8.5%	\$182,426
Full Service – Upscale*	2	52-55	\$116	59%	30%	9.0%	\$101,581
Limited Service - Upper Midscale*	1	59	\$96	57%	29%	9.0%	\$68,950
Limited Service – Midscale*	1	74	\$64	59%	39%	10.0%	\$64,091
Limited Service – Economy*	3	45-137	\$64	59%	39%	10.5%	\$51,575

* Because there are limited properties in this group, we refrain from publishing potentially identifiable information about the property. In addition to interviews with local market participants, recent hospitality sales were noted and cap rates were extracted from the market and supported by independent third party market data sources.

Office/Commercial buildings

Below we report on larger Office buildings, typically in property class 5-91 (Commercial building over three stories) and 5-92 (Two-or-three-story building containing part or all retail and/or commercial space). Each property was classified into a group based on Class C office buildings as defined by CoStar.

For specialty office types, such as medical offices, see Appendix.

	<u>Property information</u>		<u>Inputs to Valuation Model</u>				<u>CCAO Valuations</u>
Group	# buildings in this group	Size: SF/ building (range)	Income: Rent \$/SF (range)	Vacancy (range)	Expense ratio (range)	Cap rate (range)	CCAO estimated Market Value \$/SF (range)
Institutional (5-91)	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Regional (5-91)	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Neighborhood (5-91)	26	5,700- 345,227	\$16.00 - \$34.65	5%-15%	33% - 45%	5.3% - 9.0%	\$88-\$275
Neighborhood A/B (5-92)	30	4,212- 157,786	\$12.60- \$41.80	5%-15%	15% - 45%	5.3% - 8.0%	\$112-\$420
Neighborhood C/D (5-92)	162	1,620-134,285	\$9.72 - \$41.80	5%-15%	15% - 45%	8.0% - 10.0%	\$69- \$346

In addition to interviews with local market participants, recent office sales were noted and cap rates were extracted from the market and supported by independent third party market data sources.

Industrial buildings

Each industrial building was first classified into a group based on investment grade.

	<u>Property information</u>			<u>Inputs to Valuation Model</u>			<u>CCAO Valuations</u>
Group	# buildings in this group	Size: SF/building (range)	Income: Rent \$/SF (range)	Vacancy: (Range)	Exp. Ratio: (Range)	Cap rate (range)	CCAO Estimated Market Value \$/SF (Range)
Institutional A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Regional B	35	2,160-58,436	\$5.00-\$15.00	5%-20%	15%	5.5% - 8.5%	\$50.47 - \$238.23
Neighborhood C	39	2,562-42,356	\$5.00-\$8.00	10%-20%	15%	5.5% - 9%	\$51.00 - \$197.05
Neighborhood D	70	740-129,477	\$4.00-\$15.00	5%-20%	15%	5.5% - 11%	\$24.73 - \$185.45

Retail shopping centers (Class 5-31)

Here we report on retail centers like regional malls, strip malls, and shopping centers. Each property was first classified into a group based on Class B retail properties, many of which had national and regional tenants, as defined by CoStar.

	<u>Property information</u>		<u>Inputs to Valuation Model</u>				<u>CCAO Valuations</u>
Group	# buildings in this group	Size: SF/building (range)	Income: Rent \$/sf (range)	Vacancy (range)	Expense ratio (range)	Cap rate (range)	CCAO estimated Market Value \$/SF (range)
Institutional	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Regional	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Neighborhood A	3	28,671 - 208,797	\$30.25 - \$30.32	5%	33%	8.0%	\$245 - \$246
Neighborhood B	6	18,339 - 197,785	\$20.00 - \$27.50	5% - 15%	33% - 40%	9.0%	\$113 - \$211

In addition to interviews with local market participants, recent retail shopping center sales were noted and cap rates were extracted from the market and supported by independent third party market data sources.

Special commercial properties (class 5-97)

Property types include auto dealerships, mixed-use retail, storage facilities, car washes, commercial warehouse buildings and the like. Because the business uses in this building class vary, the buildings themselves tend to have dis-similar rents, vacancies, expenses and associated cap rates. Due to their special purpose nature, Nursing Homes and Parking Garages/Lots, these property types are evaluated separately.

	<u>Property information</u>		<u>Inputs to Valuation Model</u>				<u>CCAO Valuations</u>
Group	# buildings in this group	Size: SF/building (range)	Income: Rent \$/sf (range)	Vacancy (range)	Expense ratio (range)	Cap rate (range)	CCAO estimated Market Value \$/SF (range)
Institutional Office	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Institutional Retail	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Neighborhood – General Commercial *	317	1,019-236,008	\$8.64-\$50.16	5% - 16%	15% - 57%	6% - 10%	\$63 - \$381
Neighborhood A-Nursing Homes/ Hospitals **	24	60-477 beds	\$91 - \$800 /day/bed	25%	88%	9%	\$44,223 - \$303,797 (per bed)
Data Centers	N/A	N/A	N/A	N/A	N/A	N/A	N/A
Parking – surface structured and ancillary parking	8	1,650 - 141,000	\$10 - \$20 per space	15%	45%	6.5% - 9%	\$47 - \$808 per space

* Includes mixed-use properties.

** Size is based on number of Beds. Income is based on Rent/Bed; Management fees and reserves are included in the expense ratio.

In addition to interviews with local market participants, recent sales, by property type, were noted and cap rates were extracted from the market and supported by independent third party market data sources.

A1. Single-story standalone properties (class 5-17)

This property class (“One-story commercial building”) comprises a broad range of freestanding buildings. Although the businesses within these structures tend to vary, the buildings tend to have similar sale prices (expressed as \$/SF), and the rents, vacancies, and expenses used in their valuations are similar.

Property Type	Med. Sale Comp. \$/SF	Market Rent \$/SF	Vacancy (%)	Expenses (%)	Cap rates (range)
Professional Office	\$ 110.00	\$ 20.00	15%	45%	5.5% - 11.25%
Medical Office	\$ 230.00	\$ 30.00	15%	45%	5.25% - 10%
Retail/Office	\$ 125.00	\$ 22.50	15%	43%	6% - 11%
Retail-Freestanding	\$ 110.00	\$ 29.00	15%	40%	6.5% - 10.5%
Strip Center	\$ 125.00	\$ 29.00	15%	15%	6.5% - 10.5%
Retail-Storefront	\$ 110.00	\$ 29.00	15%	40%	6.5% - 10.5%
Fast Food	\$ 310.00	\$ 38.00	5%	15%	7 – 12%
Restaurant	\$ 245.00	\$ 32.00	10%	15%	7 – 12%
Other Commercial					7 – 10%

A2. Market Research

We are a team of appraisers and analysts with combined decades of assessment and appraisal experience and leadership. We don't have real-time income, expense, or vacancy information for every property, so we develop market estimates using reliable sources of market data that impacts value.

In our revaluation of Lake View Township in 2021, we incorporated data from the following sources:

- Bloomberg, a computer software system that enables access to a broad range of financial data
- CoStar, a leading source of commercial property rents and sales
- Trepp, which reports on appraisals and operations of properties receiving CMBS loans
- PWC, RERC, Realty Rates, and other national surveys
- CBRE, JLL, Cushman & Wakefield, IREM, and other leading reporting firms
- Local brokers, appraisers, and other market participants
- Properties' websites to determine rents and property characteristics
- RPIE, the Cook County Assessor's platform for owners of commercial properties to submit property-associated income, expense, occupancy rates, and similar data.

A3. How the CCAO determines Assessed Values for Commercial Properties

Reassessment starts with revaluation. To produce a fair estimate of market value and a fair assessment of most commercial income-producing properties during a reassessment year, the CCAO undertakes the following steps:

1. **Determine a property's use** by reviewing the property's history, including property class, tenants, business, and external photography of the parcel. It is important to understand the property's characteristics to accurately group it with similar properties.
2. **Estimate the income** generated by the property, and **expenses**. Most often, rent is the primary source of income for commercial property. Other incidental income streams may include fees from parking or advertising signage. Expenses include property taxes, insurance, repair and maintenance costs, property management fees, and service expenditures for professional services.
3. **Examine market-level vacancy** based on location and property type. Some level of commercial property vacancy is normal and expected. The CCAO does consider reductions as a result of vacancy when a building is not serving its intended use due to conditions outside the control of the property owner, such as a casualty event or other localized factors, or new construction that has not yet been leased.
4. **Produce capitalization rates**. Once we've been able to recreate a snapshot of a property's income statement based on market data, we use a standard valuation metric called a "capitalization rate" to convert income to value. This capitalization rate (or cap rate) quantifies the relationship between a single year's Net Operating Income (income minus expenses) and the total property value.

Cap rates have an inverse relationship to value. Properties with lower cap rates tend to have higher values. Properties with higher cap rates tend to have lower values.

5. **To estimate building value, divide its estimated income by cap rate.** A property with \$100,000 of net income, divided by a 9.5% cap rate, has an estimated market value of \$1,052,631. A 6.5% cap rate generates an estimated market value of \$1,538,461.
6. **Apply Level of Assessment, per County ordinance.** A property's assessed value depends on its market value and its level of assessment (LOA). Since 1973, the Cook County Board has passed ordinances to set different levels of assessment depending on the property's use. Multifamily properties have a 10% LOA. A multifamily building valued at \$1,000,000 has an assessed value of \$100,000. Commercial properties like office and retail buildings have a 25% LOA. A commercial building valued at \$1,000,000 has an assessed value of \$250,000.

Note that the CCAO administers incentives that permit a reduced assessment for some multifamily, commercial, and industrial properties. The goal of these programs is to promote economic development and neighborhood vitality. Learn more [here](#).

7. **Send notice of reassessment.** Many buildings are divided into multiple Property Index Numbers (PINs). Owners of multiple PINs will receive multiple reassessment notices containing the assessed value of each PIN.
